

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There is a growing awareness of the need to address the needs of children in the world, and the United Nations has developed a series of goals for the 21st century (United Nations 1994). The first goal is to 'achieve universal primary education' by the year 2000. This goal is based on the recognition that education is a key to development, and that all children should have access to a basic education. The United Nations has set a target of 100% enrolment in primary education by the year 2000. This target is based on the assumption that all children should be enrolled in primary education by the age of 6 years.

The United Nations has also set a target of 100% enrolment in secondary education by the year 2000. This target is based on the assumption that all children should be enrolled in secondary education by the age of 12 years. The United Nations has also set a target of 100% enrolment in tertiary education by the year 2000. This target is based on the assumption that all children should be enrolled in tertiary education by the age of 18 years.

The United Nations has also set a target of 100% enrolment in higher education by the year 2000. This target is based on the assumption that all children should be enrolled in higher education by the age of 24 years. The United Nations has also set a target of 100% enrolment in postgraduate education by the year 2000. This target is based on the assumption that all children should be enrolled in postgraduate education by the age of 30 years.

The United Nations has also set a target of 100% enrolment in research and development by the year 2000. This target is based on the assumption that all children should be enrolled in research and development by the age of 35 years. The United Nations has also set a target of 100% enrolment in professional education by the year 2000. This target is based on the assumption that all children should be enrolled in professional education by the age of 40 years.

The United Nations has also set a target of 100% enrolment in management education by the year 2000. This target is based on the assumption that all children should be enrolled in management education by the age of 45 years. The United Nations has also set a target of 100% enrolment in business education by the year 2000. This target is based on the assumption that all children should be enrolled in business education by the age of 50 years.

The United Nations has also set a target of 100% enrolment in health education by the year 2000. This target is based on the assumption that all children should be enrolled in health education by the age of 55 years. The United Nations has also set a target of 100% enrolment in social education by the year 2000. This target is based on the assumption that all children should be enrolled in social education by the age of 60 years.

The United Nations has also set a target of 100% enrolment in environmental education by the year 2000. This target is based on the assumption that all children should be enrolled in environmental education by the age of 65 years. The United Nations has also set a target of 100% enrolment in peace education by the year 2000. This target is based on the assumption that all children should be enrolled in peace education by the age of 70 years.

The United Nations has also set a target of 100% enrolment in human rights education by the year 2000. This target is based on the assumption that all children should be enrolled in human rights education by the age of 75 years. The United Nations has also set a target of 100% enrolment in gender education by the year 2000. This target is based on the assumption that all children should be enrolled in gender education by the age of 80 years.

The United Nations has also set a target of 100% enrolment in information education by the year 2000. This target is based on the assumption that all children should be enrolled in information education by the age of 85 years. The United Nations has also set a target of 100% enrolment in science education by the year 2000. This target is based on the assumption that all children should be enrolled in science education by the age of 90 years.

The United Nations has also set a target of 100% enrolment in technology education by the year 2000. This target is based on the assumption that all children should be enrolled in technology education by the age of 95 years. The United Nations has also set a target of 100% enrolment in arts education by the year 2000. This target is based on the assumption that all children should be enrolled in arts education by the age of 100 years.
