

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. First, the world's population is growing rapidly. The world population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1992). Second, the world's population is becoming more urbanized. The world's population is projected to increase from 25% in 1990 to 50% in 2020 (UNEP 1992). Third, the world's population is becoming more dependent on food imports. The world's population is projected to increase from 10% in 1990 to 30% in 2020 (UNEP 1992).

There are a number of reasons why the world's population is becoming more dependent on food imports. First, the world's population is becoming more dependent on food imports. The world's population is projected to increase from 10% in 1990 to 30% in 2020 (UNEP 1992). Second, the world's population is becoming more dependent on food imports. The world's population is projected to increase from 10% in 1990 to 30% in 2020 (UNEP 1992). Third, the world's population is becoming more dependent on food imports. The world's population is projected to increase from 10% in 1990 to 30% in 2020 (UNEP 1992).

There are a number of reasons why the world's population is becoming more dependent on food imports. First, the world's population is becoming more dependent on food imports. The world's population is projected to increase from 10% in 1990 to 30% in 2020 (UNEP 1992). Second, the world's population is becoming more dependent on food imports.
